VPN USERNAME CHANGE

Issue Date:	June 29, 2006
Effective Date:	July 16, 2006
Section/Group:	Network Operations
Submitted by:	Rick Gee, Nancy McConnell
Approved by:	Ken March

DTS is enhancing VPN Services to authenticate users through UMD (Utah Master Directory).

As of July 16, 2006, to use DTS VPN Client Services, all users must enter their e-mail address as the username.

Example: A user's name is Candy Lane.

Current VPN Client username: .clane.dp.as.ut
Current VPN Client password: LAN password

New VPN Client username: clane@utah.gov
No change to the VPN Client password: LAN password.

Any user who is unsure of their e-mail address or LAN password should contact their LAN Administrator.
